The tiles industry has a long history, dating back to ancient civilizations. The use of tiles has evolved over time, from simple clay tiles to modern, high-tech ceramic tiles. Today, tiles are used in a wide variety of applications, from residential interiors to commercial buildings and outdoor spaces. The industry continues to grow, driven by innovation and the demand for durable, aesthetically pleasing flooring solutions.

The tiles industry is a global market, with major production hubs in China, India, and the Middle East. The industry is characterized by a high level of competition and a focus on innovation and quality. The demand for tiles is expected to continue to grow, driven by the increasing use of tiles in residential and commercial buildings, as well as in outdoor spaces.
