

1. **Grout** is a material used to fill the spaces between tiles or bricks. It is made of a mixture of cement, sand, and water. Grout is used to hold tiles in place and to prevent water from seeping through the joints.

2. **Grout** is used in a variety of applications, including:

- **Tile and brickwork**: Grout is used to fill the spaces between tiles and bricks.
- **Countertops**: Grout is used to fill the spaces between countertop tiles.
- **Staircases**: Grout is used to fill the spaces between the treads and risers of a staircase.
- **Decorative applications**: Grout is used to create decorative patterns and designs.

3. **Grout** is a material used to fill the spaces between tiles or bricks. It is made of a mixture of cement, sand, and water. Grout is used to hold tiles in place and to prevent water from seeping through the joints.
