

Epoxy grout additive is a high-strength, non-soluble, and non-flammable material that is used to improve the performance of grout in various applications. It is a two-part system that is mixed together and applied to the grout joints. The epoxy grout additive provides a strong, durable, and long-lasting bond between the tiles and the substrate. It is resistant to water, stains, and acids, making it ideal for use in high-traffic areas and wet areas. The epoxy grout additive is also available in a variety of colors to match the tiles.
